EXCERPTED-

James Grady's **SIX DAYS OF THE CONDOR** (Norton, \$5.95), a first novel, is just plain dreadful. It has to do with a C.I.A. man whose office is wiped out. He, an innocent, goes into hiding and, helped by a girl, comes through even though professional assassins are after him—these amateurs who survive the attacks of trained killers! Nowhere are they believable, especially here in Grady's labored, childlike prose. ■
